

## Webinaire – Jeudi de l'AFGC Ingénierie Forensique

07 septembre 2023

#### Plan du webinaire

- Introduction sur l'Ingénierie Forensique:
- Présentation F. TAILLANDIER (INRAE):
  - Les modèles de connaissances pour l'IF
  - Approche argumentative sur les scénarios de défaillance
- 10 min d'échanges
- Présentation R. PITTER et M. LERESTE (APRR):
  - Approche forensique du gestionnaire sur le cas d'un tunnel autoroutier
- 10 min d'échanges

## Introduction – Pourquoi une ingénierie forensique?

(diapo tirée de présentation du Pr Denys BREYSSE-2016)

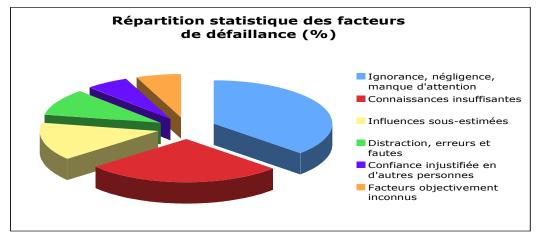

#### MAITRISER LE RISQUE EN GENIE CIVIL:

#### Les incertitudes:

- → aléatoires (naturelles, irréductibles, à quantifier)
  - exemple : intensité des cyclones, des crues...
- → épistémiques (de connaissance, de modèle... à réduire)
  - exemple : résistance des matériaux, effets du vieillissement...
- → ontologiques (erreurs..., à contrôler procédure qualité, formation)
  - exemple : manque de qualification des opérateurs

#### Le facteur humain:

choix délibéré, erreurs, incompétence, volonté de tricher, corruption...

## Introduction – Pourquoi une ingénierie forensique?

(diapo tirée de présentation du Pr Denys BREYSSE-2016)

Angers, 1850 → passage des soldats

Tay Bridge,1879 → effets du vent

Tacoma, 1940 → aéroélasticité

Orléansville, 1954 → règles PS France

Malpasset, 1959 → fondations des barrages

Ronan Point, Londres, 1968 → robustesse

Uster, Suisse, 1985 → corrosion sous contrainte

Ynys-y-Gwas, Pays de Galles, 1985 → câbles de précontrainte

Tunnel du Mont-Blanc, 1999 → sécurité dans les tunnels

Millenium et Solferino, 2000 → actions piétons

WTC, 2001 → conception IGH

Terminal E, Roissy, 2004 → MRP, organisation

Minneapolis, 2006 → surveillance des OA

## Introduction – Ethymologie

(diapo tirée de présentation du Pr Denys BREYSSE-2016)

Forensic engineering = ingénierie forensique

(Merriam-Webster dictionn.)

Etymology: Latin *forensis* (public), from *forum* 

1: belonging to, used in, or suitable to courts of judicature or to public discussion and debate

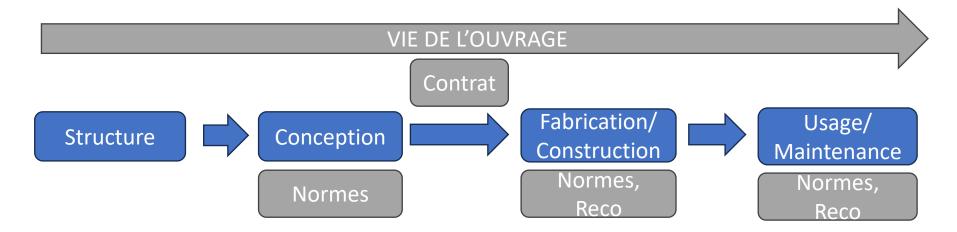

2: relating to or dealing with the application of

scientific knowledge to legal problems

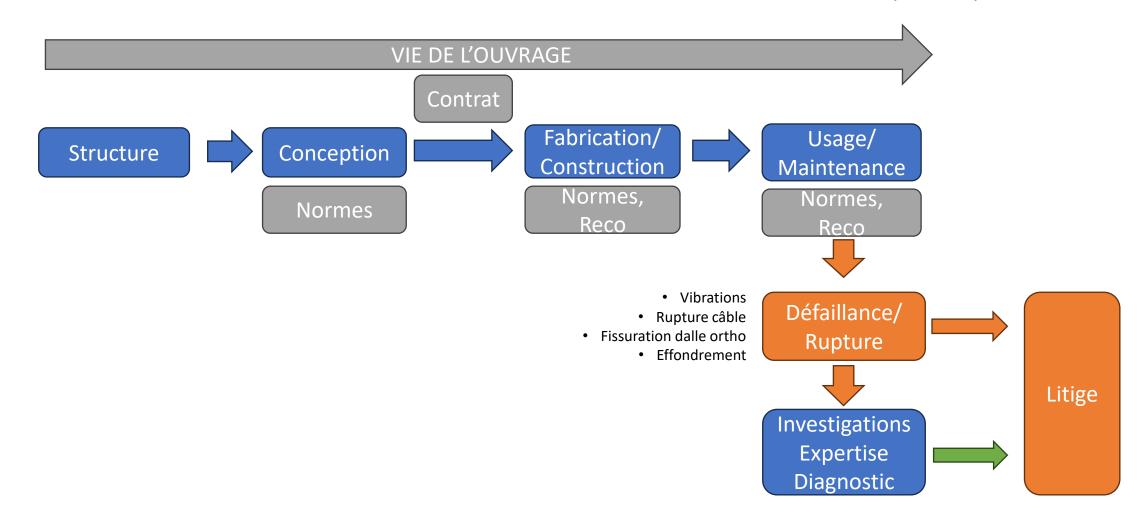

<forensic medicine> <forensic science> <forensic experts>

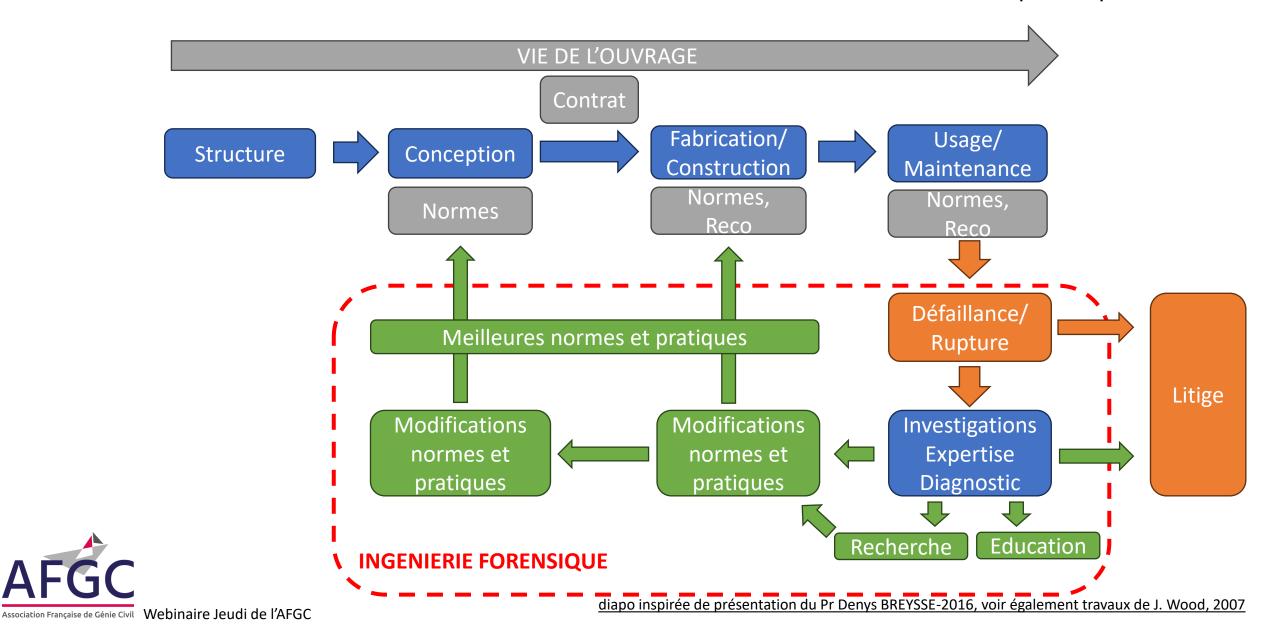

#### Introduction — De la défaillance vers l'amélioration de la pratique

#### Introduction — De la défaillance vers l'amélioration de la pratique

#### Introduction — De la défaillance vers l'amélioration de la pratique

## Introduction – et les futurs sujets?

- Sollicitations associées au dérèglement climatique (vent, houle, température...)
- Augmentation du coût de l'énergie 

   augmentation coût maintenance
  - Quid d'une révision des normes? D'une réduction des coeff. de sécurité?
- Techniques de réparation/construction contemporaines et futures
  - Utilisation de carbone, fibre de verre, matériaux biosourcés, etc...
- Etc...

### Introduction – objectifs GT

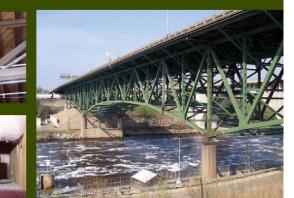

- Le groupe réunit MOE, MOA, Entreprise, Avocats, Assureurs, ...
- Rédaction guide méthodologique à destination de la profession en France
- Organisation recensement d'exemples de défaillances et approche forensique pour BDD

→ S'intégrer à la terminologie et démarche internationale

## Introduction - Bibliographie

Second Edition

#### Guidelines for Forensic Engineering Practice

Edited by Joshua B. Kardon, Ph.D., S.E.

ASCE

#### **Contents**

Chapter Authors, Contributors, and Reviewers	V
Forensic Practices Committee	vi
Preface	vii
Acknowledgments	ix
Chapter 1: Introduction	1
Chapter 2: Competencies and Qualifications of Forensic Engineers .	4
2.1. Introduction	
2.2. Qualifications of an Expert	
2.3. Attributes of Expert Engineers	5
2.4. Competencies of Forensic Engineers	
2.5. Generalist Forensic Engineer	
2.6. Conclusion	9
2.7. References	9
Chapter 3: The Standard of Care	10
3.1. Introduction	
3.2. The Standard of Care	
3.3. Expert Testimony	
3.4. Definitions	
3.5. Methods	
3.6. Validity	
3.7. Reliability	
3.8. A Valid and Reliable Method	
3.9. The Delphi Process of Expert Consensus	
3.10. Conclusion	
3.11. References	
Chapter 4: Investigations and Reports	33
4.1. Introduction	
4.2. Investigation	
4.3. Equipment Selection and Availability	
4.4. Sampling and Collection of Evidence	
4.5. Preliminary Findings and Client Consultation	42
4.6. Additional Investigation Leading to Identification of Causes of	
the Failure	
4.7. Investigation Group	
4.8. Interaction with the Media	
4.9. Safety	
4.10. Laboratory Investigation	44

4.11. Office Investigation

4.13. Conclusion	
4.15. COHCIUSIOH	5
4.14. References	5
Chapter 5: Ethics	6
5.1. Introduction	
5.2. The ASCE Code of Ethics	
5.3. Solicitation of Work, First Contact, Project Assignment, and Contract	6
5.4. Conducting the Investigation	7
5.5. Testimony	7
5.6. ASCE Code of Ethics	
5.7. Damage Done by Unethical Conduct	7
5.8. Reporting Unethical Conduct	7
5.9. Ethical Standards for Publications	
5.10. Conclusion	8
5.11. References	8
Chapter 6: The Legal Forum	8
6.1. Introduction	8
6.2. Role of the Forensic Engineer as a Witness in Litigation	8
6.3. Role of Forensic Engineers in Mediation	9
6.4. Admissibility of Testimony by Forensic Engineers	9
6.5. Conclusion	9
6.6. References	9
Chapter 7: The Business of Forensic Engineering	9
Chapter 7: The Business of Forensic Engineering	9
Chapter 7: The Business of Forensic Engineering	9 9
Chapter 7: The Business of Forensic Engineering	9 9 9
Chapter 7: The Business of Forensic Engineering	9 9 9 9
Chapter 7: The Business of Forensic Engineering 7.1. Introduction 7.2. Readiness 7.3. Marketing and Types of Marketing 7.4. Types of Assignments 7.5. When the Phone Rings	9 9 9 10
Chapter 7: The Business of Forensic Engineering 7.1. Introduction 7.2. Readiness 7.3. Marketing and Types of Marketing 7.4. Types of Assignments 7.5. When the Phone Rings 7.6. What to Take and What to Pass	9 9 9 10 10
Chapter 7: The Business of Forensic Engineering 7.1. Introduction 7.2. Readiness 7.3. Marketing and Types of Marketing 7.4. Types of Assignments 7.5. When the Phone Rings 7.6. What to Take and What to Pass 7.7. After the Decision to Take	9 9 9 10 10 10
Chapter 7: The Business of Forensic Engineering 7.1. Introduction 7.2. Readiness 7.3. Marketing and Types of Marketing 7.4. Types of Assignments 7.5. When the Phone Rings 7.6. What to Take and What to Pass 7.7. After the Decision to Take 7.8. Letter of Agreement	9 9 9 10 10 10 10 10
Chapter 7: The Business of Forensic Engineering 7.1. Introduction 7.2. Readiness 7.3. Marketing and Types of Marketing 7.4. Types of Assignments 7.5. When the Phone Rings 7.6. What to Take and What to Pass 7.7. After the Decision to Take	9 9 9 10 10 10 10 10
Chapter 7: The Business of Forensic Engineering 7.1. Introduction 7.2. Readiness 7.3. Marketing and Types of Marketing 7.4. Types of Assignments 7.5. When the Phone Rings 7.6. What to Take and What to Pass 7.7. After the Decision to Take 7.8. Letter of Agreement 7.9. Liability 7.10. Insurance	9 9 9 10 10 10 10 11
Chapter 7: The Business of Forensic Engineering 7.1. Introduction 7.2. Readiness 7.3. Marketing and Types of Marketing 7.4. Types of Assignments 7.5. When the Phone Rings 7.6. What to Take and What to Pass 7.7. After the Decision to Take 7.8. Letter of Agreement 7.9. Liability	9 9 9 10 10 10 10 11

Second Edition

# Failure Case Studies in Civil Engineering

Structures, Foundations, and the Geoenvironment

Edited by

Paul A. Bosela, Ph.D., P.E.; Pamalee A. Brady, Ph.D., P.E.; Norbert J. Delatte, Ph.D., P.E.; and M. Kevin Parfitt, P.E.

#### **Contents**

	nowledgments	
1.	Foundation Failures  Tower of Pisa (1173 & Ongoing)  Transcona Grain Elevator (1913)  Fargo Grain Elevator (1956)  La Playa Guatemala Earthquake (1976)  Schoharie Creek Bridge (1987)	2 5 7
2.	Embankment, Dam, and Slope Failures St. Francis Dam (1928). Malpasset Dam (1959). Vajont Dam (1963). Lower San Fernando Dam (1971). Teton Dam (1976). Rissa Norway Landslide (1978). Nerlerk Berm Failure (1983). Carsington Embankment (1984).	15 17 19 22 24 29
3.	Geoenvironmental Failures  Love Canal (1978)	34 36 38 40
4.	Bridge Failures  Ashtabula Bridge (1876)  Tay Bridge (1879)  The Quebec Bridge (1907 & 1916).  Falls View Bridge (1938)  Sando Arch (1939)  Tacoma Narrows Bridge (1940)  Peace River Bridge (1957)  The Second Narrows Bridge (1958)  King Street Bridge (1962)  Point Pleasant Bridge—Silver Bridge (1967).  Antelope Valley Freeway Interchange (1971 & 1994)  Mianus River Bridge (1983)  San Francisco-Oakland Bay Bridge (1989)  Cypress Viaduct (1989)	50 52 54 56 57 58 61 62 63 64 66

5.	Building Failures	70
	AMC Warehouse (1955)	7
	Ronan Point Tower (1968)	79
	2000 Commonwealth Avenue (1971)	82
	The Skyline Plaza Apartment Building (Bailey's Crossroads) (1973)	8
	Hartford Civic Center Coliseum (1978)	8
	Imperial County Services Building (1979)	
	Kemper Memorial Arena Roof (1979)	
	Binghamton State Office Building (1981)	
	Hyatt Regency Hotel Pedestrian Walkways (1981)	
	Pino Suarez Building (1985)	104
	L'Ambiance Plaza (1987)	
	Burnaby Supermarket Rooftop Parking Deck (1988)	
	Northridge Meadows Apartments (1994)	
	California State University, Northridge, Oviatt Library (1994)	
	Alfred P. Murrah Federal Building (1995)	110
	Charles De Gaulle Airport Terminal 2E (2004)	
	Four Times Square Scaffold Collapse (Conde Nast Tower) (1998)	120
Ind	ey	123
